ANSWERS

1. **Orchestra**

Orchestral music can be heard in many places, such as films, TV shows, radio, and video games. What makes the orchestra most impressive is its size and variety of instruments

2. **Bagpipes**

Different countries decorate bagpipes according to their cultural aesthetics. Although they look different, their overall construction is the same. Each contains a pipe to play the melody and drone pipes that produce a constant pitch. The bag is blown into and squeezed to make sound.

3. **Cremona**

Craftsmen in Cremona, Italy, created the first professional violin designs. World-renowned Stradivarius violins originated in Cremona, where their creators, the Stradivari family lived.

4. **Accordions**

The accordion is a free-reed, push-pull instrument that includes a keyboard or set of buttons. Accordions can play both melody and chords, making them ideal instruments to accompany singers.

5. **Harmonica**

The harmonica was originally made to be a tuning tool for instruments. It has since become a versatile instrument used in many musical styles.

6. **Balalaika**

This traditional Russian instrument is made from wood and often painted with intricate designs. In Russia there are full orchestras made up of families of this instrument.
